EDUCATION

St. Paul University Philippines **Tuguegarao City, Cagayan**

Bachelor of Science in Information Technology Major in Web Development *Graduation Date: Jun 2025*

WORK EXPERIENCE

Municipal Hall Engineering Office **Tuao, Cagayan**

Work Immersion *Nov 2017 - Feb 2018*

- Assisted in different paperwork inside the workplace
- Observed and adapted work ethics and cultural differences
- Communicated via intrapersonal skills with the team and participated in team building activities

FC Architects Construction **Tabuk City, Kalinga**

Computer Network Technician *Oct 2023 - Jan 2024*

- Maintained physical network connections
- Diagnosed network issues specifically in LAN and WLAN
- Resolving problems through troubleshooting

DICT Region II **Tuguegarao City, Cagayan**

Apprentice *Feb 2025 - Jun 2025*

- Designed and developed a Location-based Attendance Monitoring and DTR Generating System using Laravel, FilamentPHP, Tailwind CSS, MySQL, Google Maps API, DomPDF, and Spatie Permissions, streamlining attendance tracking and automated DTR generation based on verified employee locations.
- Assisted in technical support and troubleshooting for DICT personnel, including basic network diagnostics, software installation, and hardware configuration.
- Supported documentation and administrative tasks, such as preparing marketing materials, assisting in marketing, data encoding, report preparation, and coordination during trainings, meetings, and other internal activities.

Freelance **Tuguegarao City, Cagayan**

Graphic Designer *Oct 2019 - Present*

- Designed infographics for organizations and individuals
- Created logos and marketing materials for brands, gaming channels, and social media pages
- Shirt design for a variety of clients ranging from streetwear brands to sports apparel

Web Developer *Jan 2024 - Present*

- Built responsive and accessible front-end interfaces using React, Tailwind CSS, and JavaScript.
- Developed and maintained full-stack web applications using Laravel and MySQL with RESTful APIs.
- Delivered projects spanning administrative, HR, and appointment systems with a focus on usability and efficiency.

PROJECT EXPERIENCE

St. Paul University Philippines **Tuguegarao City, Cagayan**

Capstone Project - Web Developer *Jan 2024 - Mar 2025*

- Developed an integrated system for the Office of the Vice President for Administrative and General Services at St. Paul University Philippines consisting of 4 modules: Job Order Management, Venue Booking Management, Parking Sticker Application Management, and Inventory Management
- Implemented security features including Multi-factor Authentication, Zero Trust Security Model, User-Role-Permissions Structure, Device and Session Viewer

DICT Region II **Tuguegarao City, Cagayan**

Web Developer *Feb 2025 - Apr 2025*

- Developed a geolocation-based attendance tracking and DTR generating system for the Department of Information and Communications Technology (DICT) Region II using Laravel and Filament.

- Implemented features such as real-time geolocation-base attendance monitoring, user authentication, and role-based access control to enhance system security and usability.
- Integrated reporting tools to generate comprehensive attendance reports, facilitating efficient administrative oversight and decision-making.

Doctor Smile **Tuguegarao City, Cagayan**

Web Developer *Mar 2025 - May 2025*

- Developed a dental clinic appointment system using Laravel and React to streamline patient scheduling and management.
- Implemented features for appointment booking, patient records, and administrative controls to enhance clinic operations.
- Utilized modern web development tools and practices to ensure a responsive and user-friendly interface for both staff and patients.

Bounty Board **Sta. Ana, Cagayan**

Web Developer *Apr 2025 - Jul 2025*

- Developed a decentralized freelancing platform integrated with Petra Wallet, leveraging Aptos blockchain as the payment method.
- Focused on secure, transparent, and trustless transactions between freelancers and clients.
- Presented at **Hackthenorth's Hackers on the Beach: Debug 4** hackathon.

Apit Lako **Quezon City, Metro Manila**

Mobile App Developer *Jun 2025 - Sep 2025*

- Built a mobile-first digital marketplace connecting farmers directly to buyers for local produce.
- Enabled early crop listings, farm-to-market transparency, and better market access for smallholder farmers.
- Presented at the **Department of Agriculture's AgriTech: Innovate Nationals** competition.

Resq Link **Tuguegarao City, Cagayan**

API, Web, and Mobile Developer *Sep 2025 - Present*

- Designed and developed RESTful APIs using NestJS to power both web and mobile applications, ensuring high scalability and security.
- Built responsive and modern user interfaces with Next.js for web and Expo React Native for mobile, maintaining consistent design and performance across platforms.
- Implemented real-time updates and secure authentication flows to enhance communication efficiency.

Personal Projects

Echo Vision - Web Developer *Feb 2025 - Feb 2025*

- Developed a web-based AI image generation tool using React and Vite, providing users with a seamless interface to create images based on textual prompts.
- Integrated the Stability AI API to facilitate the generation of high-quality images, enhancing the application's creative capabilities.
- Implemented efficient state management and responsive design principles to ensure optimal performance and user experience across devices.

Foggo Residence **Tabuk City, Kalinga**

Freelance Technical Project *Apr 2025 - Apr 2025*

- Installed a wired Cat6 network extension and configured a TP-Link Archer AX23 (Wi-Fi 6) router to improve second-floor internet coverage.
- Conducted on-site testing and performance validationt, achieving significant improvements in coverage and speed.
- Handled project planning, online procurement, cable routing, router setup, and performance testing independently.
- Delivered a detailed proposal, timeline, and post-installation update with visual documentation to the client.

SKILLS & INTERESTS

Skills: HTML, CSS, JavaScript, PHP, Laravel, FilamentPHP, NextJs, Expo, React, MySQL, API, Responsive Web Design, Tailwind CSS, Adobe Photoshop, Adobe Illustrator, Figma, Version Control (Git), Information Security Fundamentals, Basic Penetration Testing, Linux & Windows Proficiency, Basic Networking

Interests: Web Development, UI/UX Design, Graphic Design, Cybersecurity, Continuous Learning, Emerging Tech Trends

CERTIFICATIONS

- IT Specialist – Cybersecurity by Pearson, 2024
- Certified Cyber Security Analyst (C3SA) by CyberWarFare Labs, 2025
- Career Service Professional (CSE) by Civil Service Commission, 2024
- Intro to Cybersecurity by Cisco Networking Academy, 2024
- Linux Unhatched by Cisco Networking Academy, 2024 • Ethical Hacker by Cisco Networking Academy, 2024
- Advent of Cyber 2024 by Tryhackme, 2024
- Pre Security by Tryhackme, 2025
- Introduction to Cyber Security by Tryhackme, 2025

AFFILIATIONS

- Google Developer Student Club Member, 2022-2023
- Junior Philippine Computer Society Member, 2022-Present
- Hackthenorth.ph Apprentice, 2024-Present
